# Executive Summary April 2009

Throughout this report, statistically significant differences between percentages for 2008 and 2009 are noted by < >.

#### **Executive Summary**

- Lee County hosted just over 200,000 visitors staying in paid accommodations during the month of April 2009, and more than 260,000 staying with friends or relatives while visiting the County, for a total of 466,615.
- Total visitation in April 2009 was up 7.3% from April 2008, with an increase in those staying with friends and relatives (+21.7%) but a decrease in those staying in paid accommodations (-6.9%).
- The majority of April 2009 visitors staying in paid accommodations were U.S. residents (87%), on par with April 2008. However, due to an overall decrease in visitation among those staying in paid accommodations, this translated to a 6.5% decrease in visitors from the U.S. when compared with April 2008. Canadian visitation decreased from 2008 to 2009 (-28.9%), along with visitation from Germany (-18.7%).
- Similar to April 2008, half of U.S. visitors staying in paid accommodations were from the Midwest (54%). One-quarter were from the Northeast, whereas only 9% of visitors were drawn from the Northeast in April 2008.

#### **Executive Summary**

- Average per person per day expenditures were \$133.16 in April 2009 about the same as in April 2008 (\$132.56). As with the winter
  months, April's average continued to follow an upward trend for 2009.
- Total visitor expenditures for April 2009 are estimated at \$271 million, down 2.2% from \$277 million in April 2008. Expenditures among those staying in paid accommodations <u>decreased</u> substantially from April 2008 to April 2009 (-16.4%), driven by declines in available and occupied room-nights coupled with lower average daily rates. However, expenditures among those staying with friends and relatives had a healthy <u>increase</u> (+24.2%).
- The profile of visitors by accommodation type is somewhat different in April 2009 from April 2008. Similar to the last several months, a greater proportion of visitors surveyed in April 2009 stayed at condos/vacation homes than did so last April (39% April 2009 vs. 24% April 2008). This difference is likely due to the fact that more visitor interviews were conducted at condo locations than was true for April 2008. However, the proportion of visitors staying at hotels/motels was about the same in April 2009 as in April 2008 (38% vs. 33% respectively).
- Visitor satisfaction remains extremely high, with 92% of April 2009 visitors reporting being *very satisfied* (60%) or *satisfied* (32%) with their visit. The majority (89%) indicated they are likely to return to Lee County, and three-fifths of those are likely to return next year (57%). April 2009 visitors were more likely than April 2008 visitors to express dissatisfaction with *traffic* (52% vs. 43%) and *beach seaweed* (19% vs. 11%). Both were points of dissatisfaction in February and March 2009 as well.
- April 2009 visitors are about 47 years old, with an average annual household income of more than \$108,000.

#### **Executive Summary**

- Similar to March 2009, April 2009 saw a slight decrease in occupancy and a larger decrease in ADR and RevPAR among Lee County properties year-over-year. Average occupancy rates decreased slightly from April 2008 (-1.8%) to an average of 59.2%. Hotels/motels and RV parks/campgrounds both experienced decreases in occupancy but condos/vacation homes actually experienced increases in occupancy rates. Available room nights in hotels/motels/resorts increased in 2009 (+6.4%), reducing the 2009 occupancy percentage in comparison with 2008.
- Overall average daily rates dropped somewhat in April 2009 from \$150.24 in April 2008 to \$142.16 in April 2009 (-5.4%). ADR decreases were present in all lodging accommodation categories.
- Overall RevPAR was down from April 2008 (-7.1%), due to a decrease for hotels/motels/resorts (-17.1%) and RV parks/campgrounds (-16.6%), with an increase for condos/vacation homes (+9.2%).

	Average Occupancy Rate			Ave	rage Daily F	Rate	RevPAR		
	2008	2009	% Change	2008	2009	% Change	2008	2009	% Change
Property Managers Responding	141	159		139	160		139/141	159/160	
Hotel/Motel/Resort/B&B	65.1%	59.5%	-8.6%	\$173.55	\$157.42	-9.3%	\$113.01	\$93.73	-17.1%
Condo/Cottage/Vacation Home	54.1%	62.8%	16.1%	\$206.79	\$194.50	-5.9%	\$111.84	\$122.08	9.2%
RV Park/Campground	58.3%	54.8%	-6.0%	\$47.85	\$42.47	-11.2%	\$27.90	\$23.27	-16.6%
AVERAGE	60.3%	59.2%	-1.8%	\$150.24	\$142.16	-5.4%	\$90.63	\$84.16	-7.1%

- In April 2009, available roomnights decreased overall (-8.5%), and occupied roomnights decreased slightly more (-10.2%). Hotel/motel/resort available roomnights were up from a year ago (+6.4%), but occupied roomnights decreased slightly (-2.7%). RV parks/campgrounds experienced a drop in both available roomnights (-19.4%) and occupied roomnights (-24.3%). The same was true for condos/vacation homes (-23.4% in available and -11.1% in occupied roomnights).
- Property managers in April 2009 were no more negative than they had been in April 2008 when comparing the current month's *occupancy* and *revenue*. About half reported their *occupancy* was worse than the prior year (46% April 2009 and 47% April 2008). Similarly, half reported their *revenue* was worse than the prior year (53% April 2009 and 50% April 2008).
- However, projections for the next three months (May-July) remain low with 61% reporting that reservations for the next three months are down (compared with 37% who responded similarly in April 2008). One-third report business as the same or better for the next three months, as compared to more than half (56%) who responded similarly last year.

#### **Expenditures by Lodging Type**

#### Paid Accommodations Expenditures by Lodging Type

### **Direct and Indirect Impact of Visitor Expenditures**

Estimated total visitor expenditures (detailed in 16 expense categories) are entered into an input/output model designed specifically for Lee County. This model classifies the visitor expenditure dollars by industry and identifies how the dollars move through the County economy. This Regional Input-Output Model is based on an economic model designed by the Federal Government, but it is modified using County Business Patterns to reflect how the economy of Lee County actually works.

In the text and figures which follow to describe the impact of visitor expenditures on Lee County, both direct and total impacts are mentioned.

#### **DIRECT IMPACTS**

Economic benefits due directly to visitor expenditures.

For example, when visitor expenditures pay the salary and benefits for a hotel desk clerk, that amount would be considered in the direct impact for both jobs and income.

#### TOTAL IMPACTS

Total impacts are the sum of <u>direct</u> and <u>indirect</u> impacts.

<u>Indirect</u> impacts are the additional economic benefits supported during additional rounds of spending.

For example, the front desk clerk pays income tax and property tax which are an indirect result of visitor expenditures. The front desk clerk also pays his/her utility bills, buys food for his/her family, shops for gifts, etc. Those dollars create the indirect impact of the initial traveler expenditures through many additional rounds of spending in the economy.

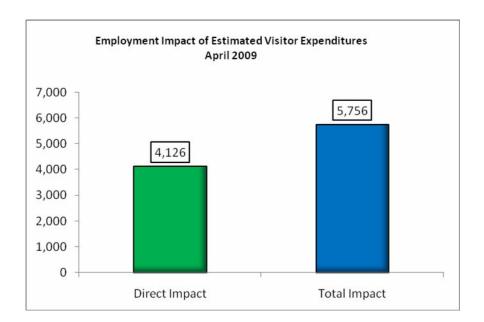

## Impact on Jobs for Lee County Residents

In order to produce the output (food, lodging, entertainment etc.) purchased by visitors, businesses have to employ people.

The number of jobs necessary to produce what is purchased with visitor expenditures is the employment impact of the visitor expenditures.

Direct employment includes the number of employees necessary to produce the direct output purchased with the visitor expenditures.

<u>Total employment</u> includes the number of employees necessary to produce the direct output purchased with the visitor expenditures <u>PLUS</u> the employees necessary to produce additional output purchased with the recirculation of money in Lee County. For example, wages paid to a hotel desk clerk are then used to purchase food and services for that employee, leading to additional supported jobs (grocery store proprietor, auto mechanic, etc.)

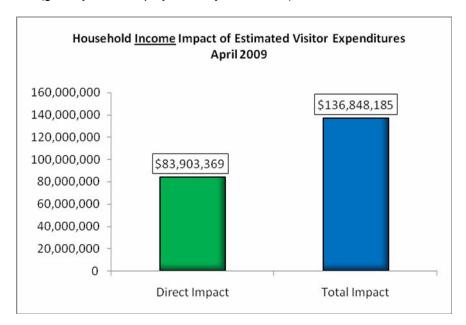

### Impact on Household Income for Lee County Residents

As stated earlier, in order to produce the output (food, lodging, entertainment, etc.) purchased by visitors, businesses have to employ people. This requires business owners to pay wages and salaries to their employees, and also includes proprietary income for the business owner in some cases.

The wages and salaries paid in order to produce what is purchased with visitor expenditures is the household income impact of the visitor expenditures.

<u>Direct household income impact</u> includes the direct wages and salaries paid in order to produce the goods and services purchased with the visitor expenditures.

<u>Total household income</u> includes the wages and salaries paid in order to produce the goods and services purchased with the visitor expenditures <u>PLUS</u> the wages and salaries necessary to produce the additional output purchased with the recirculation of money in Lee County. For example, wages brought home by a hotel desk clerk are then used to purchase food and services for that person and his/her family, leading to additional wages and salaries being paid to others (grocery store employee, utility crews, etc.)

### Impact on State and Local Government Revenues

In producing and selling any goods and services purchased by visitors, both local and state revenues are collected by local and state governments.

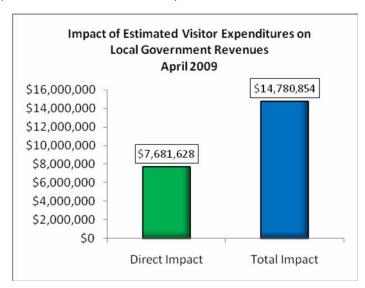

The gross government revenues accruing to governments as a result of producing the output purchased with visitor expenditures is the government revenue impact.

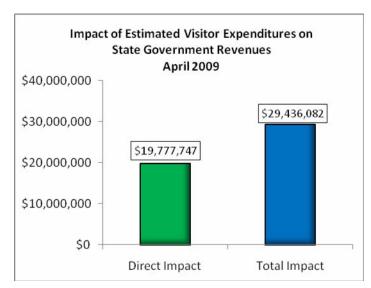

<u>Local government revenue impact</u> is a result of revenues provided to the local (Lee County) government. This includes the bed tax, local property tax, any local-option sales tax, and any operating income for local government agencies.

<u>State government revenue impact</u> is a result of revenues provided to the Florida state government. This includes sales tax and any operating income for state government agencies.

The following are included in government revenues as appropriate for the local area: gasoline taxes, vehicle licenses and registrations, boat registrations, hunting and fishing licenses, liquor taxes, local and state park user fees, etc.

Tax ratios used to calculate these government revenue impacts are adjusted to conform to data reported in State and Local Government Finance Data (SLGF, Bureau of the Census).
